

EKOF products for perfect water treatment

Treatment for boiler and heating systems:

EKOFACT A2015	alkalising of boiler water and steam for corrosion control, steam-volatile, based on ammonium hydroxide
EKOFACT A2035	alkalising of boiler water and steam for corrosion control, non-steam-volatile, based on sodium hydroxide
EKOFACT KA	combination of scale inhibitors and dispersants, phosphate-free, based on organic polymers
EKOFACT KP	combination of scale inhibitors and dispersants, based on phosphonates and organic polymers
EKOFACT Mo	combination of scale inhibitors, dispersants and corrosion inhibitors (iron and copper), zinc-free, based on molybdate, phosphonates and organic polymers, only for heating systems
EKOFACT OD	catalysed oxygen binder for corrosion control, steam-volatile, based on DEHA
EKOFACT OS	catalysed oxygen binder for corrosion control, non-steam-volatile, registered for food industry, based on sodium sulphite

Treatment for drinking water systems:

EKOFACT T-100	combination of scale inhibitors for hard water, dispersants and corrosion inhibitors for combined installations made of iron and non-ferrous metals, based on phosphonates and silicates
EKOFACT T-200	combination of scale inhibitors for very hard water, dispersants and corrosion inhibitors for combined installations made of iron and non-ferrous metals, based on phosphonates and silicates

Cleaning and defoaming products

EKOFACT R1015	liquid, cleaning agent for iron, aluminium, copper, brass, zinc, chromed and tinned surfaces, based on sulfamic acid
EKOFACT R1025	liquid, cleaning agent for iron surfaces, based on hydrochloric acid and corrosion inhibitors
EKOFACT R1035	liquid, cleaning agent for iron surfaces, based on sulfuric acid and corrosion inhibitors
EKOFACT E1015	liquid, defoaming agent
